

Penelope Stiglitz lived in Boston. Her father had gained great riches by selling cloth. He had formerly been a Professor at Harvard, but went into mercantile life that he might amass wealth and build a telescope so powerful that his theory of the sun's spots would be proven true and his enemies hounded. When the money was secured he had forgotten about the telescope. Penelope was his only child, and she loved her father dearly, kissing him kindly every evening after he had come from the store and changed his clothes. She was not partial to cloth.

One day Penelope was seated alone in her boudoir (Boston) for quiet reading a treatise on horizontal cleavage, in red conditions when the *Teleoscopist* struck came in. The two girls chatted for a while on the progress of civilization in Europe.

"Have you seen that striking Mr. West from Chicago recently, Pen?" asked the *Teleoscopist*, suddenly changing the subject of conversation.

A bright flushed girl's voice said, "I know as she said softly, "I am going to make him."

Not a word was spoken for at least a second. Then Miss Quirk said, "Why do you marry this man?"

"Let me tell you," replied Penelope, "you know I am cultured—too much so, perhaps. When, therefore, Mr. West invited me, soon after his arrival in Boston, to attend one of the Wednesdays organ concerts, I consented, little knowing what awaited me."

"When the first piece was over (I remember it was the 'Tannhauser' overture), I sat quite still, the tears rolled down my face, but no words would come. Then it was I knew in an instant how perfectly sympathetic were my companion and myself; if he had at that moment uttered one of the complements or conventional criticisms one hears often, I should have fled him forever. But he did not; he only said, very quietly, after I had recovered myself a little, 'I am so thankful that you heard it first with me,' and I replied, 'If only it might last forever!'"

Two weeks later the marriage took place, and Penelope is now a resident of Chicago. The wild, free life of the golden West suits her exactly, and on Monday afternoons when she is lounging and the clothes, and the southwest breezes hummily through the clothes pins in her smooth, undresses her negligees to see what she thinks of the Wagner concert, and especially to herself. "After all, I even still tread on the earth's tail when the feeling of loneliness comes over me." [The *Chicago Tribune*]

Showing a pretty tooth.

"You mark my words. She won't go into the water again you see. Why, he could pull all to pieces if she did. She has a very nice smile and pretty now, but the water would make her a sight. That's her been with her. She can't suppose she is going to show what elegant terms she hasn't got by going into the water." I tell you she is all shamed. The water would pull her dress all down and would show ever bit of the padding about it!" Belle tosses her head disdainfully. Belle is right. The beautiful hair is not wet with salt water. The young girl steps into the room which rolls up the beach, and with six selected little settee-pieces laid in an instant "Oh, it's grand!" she cries, although her hands have been hardly wet. Her escort comes to her rescue, and after a sufficient amount of giggling, the girl allows herself to be dragged up to her knees. But no further will she go. In a moment she is out. And then I see through it all. The beauty of silk stockings close to her hands and are prettier than ever. It is a very pretty ankle she has and everybody knows it, and the girl and her escort prance up and down the beach they are the center of attraction. It is hard to believe that a girl will do such things, but it is a cold fact, and on every day occurrence. [I] am very Letter.

What "Ta-Ta" Originally Meant.

For several years American paragraphs on this subject have used the Southern expression, "ta-ta" as a term of luminous farewell, thus giving its meaning entirely different from that it started out in life with. Native who was ever petted, loved and spoiled by a kind old black "mammie," can ever forget that "ta-ta" in baby dialect is "thank you" or, to give an exact definition from our unwritten vocabulary, "chunky." "Ta-ta" belongs exclusively to the little ones; it is as peculiarly their own as are "atty cat" and "this little pig went to market," and all those wonderful things belonging to child life. To the great world "ta-ta" is nothing but a ludicrous expression, but to many of us there's something half touching, half comical in the quaint old words that bring back so vividly the days when we planted radish seeds, rode stick horses, believed in ghosts, knew that the tories were hiding in the ferns, and that pots of gold were awaiting us at the end of the rainbow. [Detroit Free Press.]

A BRIGHT RUMINATION.—It is generally believed that rum is made of mare's milk only, but we are assured that the rumins prepared by the following recipe is equal in all respects to the best imported. Take one quart of new milk, one gill of fresh butter-milk and three or four lumps of white sugar. Mix well and see that the sugar dissolves. Put in a warm place to stand ten hours, when it will be thick. Pour from one vessel to another until it becomes smooth and uniform in consistency. Bottle and keep in a warm place twenty-four hours, it may take thirty-six in Winter. The bottle must be tightly corked, and the corks tied down. Shake well five minutes before opening. [New York Mail.]

It is estimated there are 460,000,000 Methodists in the world; 360,000,000 Baptists, and 195,000,000 Roman Catholics. The Methodists are by at least ten per cent the most numerous in the world.

STANFORD, KY., FRIDAY, SEPTEMBER 16, 1881.

WHOLE NUMBER 497.

RATES OF ADVERTISING.

Young Man, Costa Rica County.

Having visited all part of the county in the last few days, I can say with a certainty that not more than a tenth of even will be made. The people are hopeful and cheerful and are economizing, and I have no doubt will go through the winter, and come out, in the spring with as plenty as usual for family supplies. The man Zimmerman is pushing his rail road along down among us, giving employment to hundreds of hands and teams and leaving money and provisions all over the eastern part of the county, where like never was seen before or ever expected. The man begin in the extreme south end of the county, with his fine saw-mill, and giving employment to quite a number of hands and teams—purchasing and paying fair prices for timber where it was heretofore worthless to the owners. Wright A. Brown, too, have one of the finest saw-mills in the state, and are working up the popular and walnut timber in the west end of the county 10,000 to 15,000 feet per day. I, Ray, the mill man, Clegg, has just got into operation a fine saw mill three miles North of Liberty, sawing from 5,000 to 10,000 feet per day. Logan, from your county, is now at work resetting his saw-mill just North of Liberty, and in a few days will be laying away at the rate of from 2,000 to 2,500 per day. Both hills and hollows are alive with the sounds of the woodman's ax and saw. Staves, poles and hickory spikes line the roadsides, and in the intervals great piles of timber ready being drawn out from the bank to ready to start to market, and yet there is room in Clegg country for several other saw-mills. The West part of the county can give employment to a half dozen saw-mills for the next five years, and then Clegg county has more good second rate farming lands than any other county in the state, and can and will offer her lands to industrious settlers at as cheap rates as can be found in any county in the state. We have good transportation roads running through various parts of the county, good society all over the county, good common schools with competent teachers, many running of well-organized and high schools with splendid buildings and full corps of teachers, now in full operation at Middleburg. We invite immigration and want mechanics and machinists to visit our country and see for themselves. More anon. Clegg Man.

Poofish calculating.

We frequently see statements made of how much the united forces of a large number of persons would amount to, as there was no significance in lumping together the yeasts of different persons. These calculations are just about as important and useful as it would be to reckon how many inches the trees in all the world would measure if they were cut down and placed in line, or how long it would take a flight to reach the moon, going backward, provided he jumped forward three feet every day and fell backward three feet and three inches every night. One of the papers that deals in economic suggestions has the following: "As the ceremony was under way the girl jerked back, exclaiming 'I'll be Johnniedom if I do!'"

The Squire suggested that the license had been given and they had gone most too far to look out now. "That's all," said John, "Stand fast, Sally." Don't git all infernally now," gently taking her arm. "Don't 'long in place, it's most over with"—and she shuddered. As the Squire said, "I now pronounce you man and wife."

"I'm afraid," cried the bride, "that I done it."

The Louisville Post draws this dark picture: "The plagues of Egypt are upon us. There is a conjunction of evils all around us, the disaster follows hard upon the heels of another. The elements are even spottier, and the heavens during the year have been full of delusions. Moon dog and sun dog have come and vanished. The hundred President's arrival at Long Branch is signified by a mirage of the sea, with all manner of ships for forty miles around turned upside down in the air, and sailing of terrestrial ports. The face of the sun is patched over with spots; the volcanoes are throwing up, as if the earth were a very sick planet, and could hold nothing in its sinews; crops have been parched up, and in New England, Michigan and Canada everything is going up in a blaze."

The papers have said so much about Mary Anderson's trials being attenuated, that she told an interviewer her opinion of her own defects. She said, "I am aware of the fact that I would not appear to advantage in the ballroom, but that gave me talent and expected taste to do the balance, and I made a failure of her part, so I blame it for it." It is just to incriminate the faults over which I have no control. Criticize my acting, my voice, my gestures, anything you will, only please don't blame it to my limbs." Long ago she advised newspaper men to keep their hands off this subject, and to attend strictly to the man's role and gestures. We do not care if her legs are like corrugated copper lightning rods and bowed like a pretzel; her wrists what tortuous. Her sinews and mouth full of gum are enough to make a man strain his parents. [Vicksburg Daily Dismissal.]

Frank Martin, a handsome young minister, was under sentence of death in the jail at Louisville, Ky. Time hung heavily on his hands, and torpidly he wrote tendril notes to the sheriff's daughter, Maggie. She did not reply to the first letter, but to the second, he tore up his nose of hard labor, worried his friends with his complaints because he had nothing to do, peevishly beat his benefactors without thanks, and goes on from day to day sullen, listless, listless.

An individual bought an admission ticket to one of the San Francisco theaters some weeks ago and sat himself down in a reserved seat, and refused to vacate when so requested by the usher, and had to be removed by force. He took his case into the Courts, and last week the case was decided against him, the Judge claiming that a manager had a perfect right to charge what he pleases for seats in his house—\$100 each if he wishes, and can hold the seat for the party reserving the same, no one else having the right to occupy it.

The pickle business on Long Island has become an important branch of industry. The pickling of cucumbers began three weeks ago, but the crop this year will be light. The concern has contracted for the delivery of 32,000,000 lbs. at \$1 per 1,000. The usual product of an acre is 100,000 cucumbers, and it cost about one-third of the selling price to pick them. The growers ask \$65 an acre. The market price for cucumbers in New York is \$2 to \$2.20 per 1,000.

At Zürich, in old days, when man and wife quarreled and applied for a divorce, the Magistrate never listened until they had made a trial of wifely conduct. They were locked up together for three days and nights in one room, one person to a chair, one table, one bed, one plate and tumbler. Their food was passed to them and the records kept that when let out neither of them wanted to be divorced.

There is no excuse for men not being equal to their fellow men as they meet along the highway and byways of the world, and he who gives as an excuse for inability his absorption in business to the exclusion of every thing else shows that his mind is too weak to grasp more than one thing at a time and there should be a guardian appointed. [St. Louis Daily Bee.]

A RECENT RUMINATION.—The Treasurer of the United States has received a number of inquiries from the West asking what the Government will pay for melted silver money. The information is desired, it is said, by people who wish to go into the business of buying up such melted silver pieces, which in many cities can not be passed in trade. The Government has melted coin at so much for the amount of bullion contained therein. There is no suspicion that the same class of people who made a business of cutting out small pieces of silver from the minor coins and then passing them as such a low figure that they can sell to the Government at 16 million dollars and turn in a profit.

There is no excuse for men not being equal to their fellow men as they meet along the highway and byways of the world, and he who gives as an excuse for inability his absorption in business to the exclusion of every thing else shows that his mind is too weak to grasp more than one thing at a time and there should be a guardian appointed. [St. Louis Daily Bee.]

A RECENT RUMINATION.—In the upper part of Sonoma county, Cal., a railroad track crosses a deep ravine upon the top right trunk of tall trees, which have been raised upon a horizontal line. In the center of the ravine a false support is furnished by two huge redwood trees which have been lopped off so as to rest above the ground.

The tree is the organ most speedily disordered for material purposes. Averr. Aguirre

A Bride That Hesitated.

A couple from Virginia landed in Milford the other morning to be married to "Squire" Lewis. They walked hand-in-hand down Main street and took a seat upon the front step of the "Squire's" office, and the maxisked for license. As the "Squire" was preparing to make it out the bride girl began to inch out, and hesitated, and finally said to the young man in a half whisper,

"John" and she, "I don't believe I will—never feel so illustrated—Awful! I wonder what people are doing now. I feel right tremendous less go back come on, John."

"Well, don't want the license then?"

"I'll do that, Miss, yes, we do," said the "Squire," "but I will closer up and get the child to earnest work." "Now, Sally," said he, "don't you think way 'twould the folks say?" "It 'd be awful hard now."

"An' that's the same stow away Tom Brown's to-night, we'll see that, and Sister Jones would just die disgruntled over it when she heard we come. I don't want her married just now."

"Sister, fix on your pants," said John.

"Mister, fix on your pants," said John. "Marrin's muthin' no won't standin' up in spellin' class at Oldfield School."

"Well, stand up," said the "Squire," "I'm ready."

But as the ceremony was under way the girl jerked back, exclaiming "I'll be Johnniedom if I do!"

The "Squire" suggested that the license had been given and they had gone most too far to look out now.

"That's all," said John, "Stand fast, Sally." Don't git all infernally now," gently taking her arm. "Don't 'long in place, it's most over with"—and she shuddered.

As the Squire said, "I now pronounce you man and wife."

"I'm afraid," cried the bride, "that I done it."

The Louisville Post draws this dark picture: "The plagues of Egypt are upon us. There is a conjunction of evils all around us, the disaster follows hard upon the heels of another. The Interior Journal.

STANFORD, KY.

Friday Morning - September 16, 1881

W. P. WALTON, Editor

In common with many other newspaper publishers, we have for the last few years thought more about running up our subscription list than getting the money from those who subscribed. About 2,000 names have rewarded our efforts, but what does a subscription list a mile long amount to unless each subscriber represents \$2 cash in the Treasury? Simply nothing but expense and vexation. Looking over our list we see perhaps 500 delinquents. Every man of them is able to pay, but ten chances to one the larger half will get mad when we intimation that a settlement must be made, and after paying up to date, disown their paper. And the longer the indulgence, the greater the insult is deemed, when pay is demanded. Experience is a terribly expensive teacher. We have paid several thousand dollars, and it is about time now we were getting some return for our education in that line. We have found that the cash-in-advance system is the only one on which a paper can run successfully, and from this date we shall adhere to it. We can not afford to send papers out and pay men more than the accounts are worth to collect them. When the first took charge of the paper, many of the patrons of former enterprises of the kind had suffered by bankrupt, and in some cases, by dishonest publishers, and it was necessary, in many cases, to prove that we had come to stay by not demanding the money where there was the slightest suspicion that we would soon give up the enterprise. There is no cause now for any such indulgence. We have proven by nearly seven years of hard work that we intend to make this a life-time business, and in order that we may be saved the worry and vexation of trying to collect \$2 here, there and everywhere over the country, and be enabled at the same time to publish a better paper, we must and will hereafter demand the cash in advance on all subscriptions, job work and transient advertisements. We mean every word we say, and we hope that every subscriber whose label reads a date further back than SEPTEMBER 16, '81, will make it a business to remit back dues and send \$2 for another year. Of course the much the larger number of our subscribers are cash-in-advance men, and to them we return our heartiest thanks. We have tried to give them their money's worth, and should we issue our contemplated Semi-Weekly, as in all probability we will, we will show our appreciation of their favor by filling out the time for which they have paid with two papers a week without extra charge.

The "News," published at Louisville, continues to improve. The number for September is especially fine, both in cartoons and in reading matter. The "Summer Tourist," on the first page, and the pictures illustrating the poem, "Millennium Springs," are well executed and very laughable. The two-page picture of the "Solid South," with Mr. Basil Duke's article on its "Present Past and Future," is decidedly meritorious, and calculated to work beneficial results for the land so hot in climate, soil and minerals. Messrs. J. K. Mulkey and M. K. Pellegrin, the founders of the "News," have enlarged their facilities by forming a joint stock company, and we trust their enterprise will be rewarded by a permanent and paying patronage. The October edition will be 50,000 copies.

In a four-column article on the meaning of the "disability" of the President, as used in the Constitution of the United States, the New York Sun conclusively shows that there is no warrant and no necessity, either existing or imaginary, for Arthur to take upon himself the duties of President. That shielded him from writing an affectionate letter to his mother some time ago shows this, and that he is in his right mind, which is moved by the best of sense, is plainly exhibited by his order discharging two useless attending physicians. When the breath is out of Garfield's body will be plenty time for such a man as Arthur to take the reins of government, and much too soon for the good of the country.

A PHILADELPHIA lawyer has, since the time whereof the memory of man remem-ber not to the contrary," been so noted for his shrewdness that his class has become a by-word to express particular astuteness. But the keenest of all racers is sometimes caught, and it now becomes our duty to chronicle the fact that two deciples of Black-stone, claiming the Quaker City as their home, have been convicted of tampering with a will, and sent to the penitentiary for 10 years. One of them was effected when the striped suit was put on him, but he actually shed tears; the other took the matter more philosophically, and to-day they are doing the State the first genuine service of their lives.

That "it is an ill-wind that blows nobody good" is again demonstrated, and the Long Branch hotel-keepers are the beneficiaries. The season of that fashionable resort had well nigh closed, and several of the hostels had shut up for the winter, but the arrival of the wounded President has revived business, and rooms at \$6 per day for the amateur are more in demand now than at any time during the season.

THERE are some prospects now that the Republicans will not have a majority in the next House. If the Democrats in New York do their duty, and fill two of the four existing vacancies with their members, the Republicans will have to draw on the Greenbackers if they succeed in securing an organization of their own.

GUYON is not so safe in jail as he imagined he would be. A cracky guard blazed away through his window the other day, and sent a ball through his coat. The guard, who is a sergeant, may have loaded his gun especially to kill the assassin, and says he would give \$10,000 rather than have missed his purpose.

AMID the wreck of mire and a crash of worlds comes the startling information that the peanut crop is short. Surely there is no boom in Gilded sufficient to soothe the sorrow that this intelligence uses every where creates.

It turns out that Sergeant Mason, who shot at Guyon, is an Ohio man. He will be tried by court-martial, and already a five-cent subscription has been started in the Bankey State to pay his counsel.

We presume that in the exuberance of our feelings we may be permitted to remark that the backbone of a most disastrous drought is at last broken. For more than two months the dry earth has been parched by heat almost unprecedented, for so great a time, and the crops which promised so well have been reduced to comparative failures. The results in this vicinity are that the late vegetables were entirely ruined; grass was cut short, and of a consequence stock suffered and were reduced in weight; the corn crop will fall short of half a yield, and the fruit, not sufficiently nourished to mature, has fallen to the ground, tasteless and worthless. Fires have done much damage in localities, and the scarcity of water, both for stock and drinking purposes, has caused much expense and trouble, but notwithstanding all these afflictions our future is not half so dark as it might be. The rains have come in time to bring out the grass wonderfully, and with the largest crop of hay ever harvested here, rales will be able to winter their stock with but little inconvenience. There is a good deal of old corn in the country and enough wheat for bread, and we guarantee that everybody who will work will find plenty to eat and obtain money enough to supply the other necessities of life. A little economy may be necessary, but that ought always to be practiced. Let us be thankful that matters are no worse, and then strive by patient industry to make them better.

AS usual on the last of the week, a new complication in the President's case was supposed to have developed last Saturday. It was given out that the blood-poisoning that had affected the parotid gland, but which had about regained its normal appearance, had affected the lungs, and that the symptom was the worst that had occurred. The news created much alarm and anxiety, but when Wednesday's daily came head-lined with the glorious intelligence that the President had been able to sit up in a chair a short time the previous day and converse with the Postmaster-General about the Star Route trials and other matters, depression gave way to joy, and hope, which springs eternal in the human breast, took the place of despair. Then the move to Long Branch has been attended with good results there is not a doubt, and the welcome change in the weather that has aided in these results, will cause the whole country to praise God from whom all blessing flow. Yesterday the news was equally as favorable, the patient not only being able to sit up, but to eat a peach or two with a relish.

J. H. JACKSON, the colored Elector for the State of Georgia, spoke here Tuesday night. He was pretty severe on the State of Kentucky for making the colored men pay a dollar-and-a-half tax while a white man, and then not give him as much school money, and for not putting negroes on the juries. The only way to obtain their rights, he said, was by a suit brought against the State in the U. S. Court. We agree with Jackson that the State owes the colored race more educational facilities than she has given them, but, as Colonel Hill, who was called on for a speech said, a Federal Court said is not the way to obtain them. The Colonel gave the crowd some excellent advice, and was followed by W. H. Miller, Esq., who scored it into Jackson on the jury business. He said that no true man wanted to serve on a jury; that it was a duty not a privilege, and warned the colored people to take some other course than that urged by Jackson, to secure what they deemed their rights.

THE Indians are an expensive evil to the Government. Since the treaty of 1868, in the shape of direct appropriations alone, the Sioux have cost the country \$19,000,000. —H. H. Logan, who shot John Lynch in Shelby county on the 5th, has been held in \$500 for shooting in sudden heat and passion. Lynch was able to appear in Court. —Three white men and two Indians were hung at Fort Smith, Ark., last Friday, on the same gallows and at the same time. There was some lively kicking for a few minutes. —Like Arnold, the would-be murderer of Commonwealth's Attorney Bronson, has paid his fine of \$1,000, and is now at his home in Springfield. He says he was subjected to the most inhuman treatment while in prison.

THE Richmond Herald says: "The Danville Advocate and Interior Journal will endeavor to change from weekly to semi-weekly; the Herald will remain weekly." Of course it will. Could anybody expect otherwise?

—Last Saturday a clothing merchant sent up a balloon as an advertising dodge, and promised to give a suit of his best goods to the person finding and returning it. It landed near Campbellsville, and the finder has gone for his reward.

—From all indications at the present time the belief is warranted that the Cincinnati & Ohio River Railroad, to run from that city along the bank of the river to Huntington, W. Va., will be built within one year's time. The road when built will be a standard gauge, with four grades, not exceeding fifteen feet to the mile, curvature light—track to be laid with steel rails, and in all respects to be made a first-class road. Connections will be made with all roads entering Cincinnati, and for the East, North and South with the Scioto Valley, the Chesapeake & Ohio, the Richmond & Allegheny, the Ohio Valley, (Pennsylvania line), Ohio & West Virginia, the Ohio Central, the Chattahoochee of Kentucky, and the proposed Baltimore, Cincinnati and Western Central.

—A blood-curdling accident occurred on the Shellyville branch of the L. C. & L. I. last Thursday night. The engine was thrown from the track west of the bridge which crosses Floyd's Fork, knocking the structure from its piers and throwing the train about thirty feet from the line into the bed of the creek. Eight people were killed outright and thirty odd wounded, among the former are Col. Fielding Nell and Capt. Medlock, the latter Marshal of Shellyville. The train and engine were on entire loss. Another accident followed close on the heels of this. The engine of the New Orleans Express of the L. N. & W. jumped the track at the frog at Seneca. The engineer, John Slade, was killed instantly, and his fireman, Oscar Lilly, so badly hurt that he has since died.

—The most destructive forest fire known in the section, raged in Northeastern Michigan, a few days ago. Towns were wiped out, and over 300 people were burned to death. The destruction among the survivors is terrific, and appeals for aid are being responded to in all parts of the Union. The Mayor of Port Huron has appealed for help saying: "We hear of more than two hundred victims already buried, and more charred and bloated bodies daily discovered. Already more than fifteen thousand families are found to be utterly destitute and homeless. They huddle in barns, in school-houses and in their neighbors' houses; and the scorched, blinded hopeless and sorely ill wander half-crazed around the ruins of their habitations, vainly seeking their dead, some in speckles which wring their bands and refusing to be comforted. More than 10,000 people, who only a week ago occupied happy, comfortable homes, are to-day homeless and homeless sufferers. They are hungry and naked when found and in such great numbers and so wildly scattered that even the best efforts and greatest resources fail to supply their immediate wants. Without speedy aid many will perish, and many will suffer."

IT is proposed by Governor Blackburn to take several companies of the State militia to the Yorktown encampment, and to pay their expenses by negotiating the bill of notes, which the next Legislature will be expected to pay by an appropriation. The sum will be \$10,000 rather than to such a measure, and very justly.

IT turns out that Sergeant Mason, who shot at Guyon, is an Ohio man. He will be tried by court-martial, and already a five-cent subscription has been started in the Bankey State to pay his counsel.

THE papers, which are adverse to Senator Beck's re-election, continue to boast about the alleged interview that he gave a Milwaukee paper, although the Senator positively denies that he ever had the language attributed to him. We do not believe that Beck would lie about the matter, neither do we think him capable of double-dealing, but we would like him just as well and a little bit better, if the Republicans were not so strongly for him. It looks suspicious, to say the least.

SOME crank suggests that the National debt is being paid off too fast, and says the tax on several articles, especially tobacco, ought to be taken off. We would suggest that it be increased instead, and let the surplus go toward relieving something more necessary to life. Tobacco and whisky cannot be taxed too highly.

ANOTHER Republican official has gone wrong. J. L. Wartmann, Deputy Collector of Customs at Cincinnati, confesses that he has appropriated to his own use over \$10,000, which he collected from railroads on bonded goods. They all do it sooner or later.

THE gubernatorial canvas in Virginia is waxing exceedingly warm, and all the indications point to a victory for the Democrats. Senator Johnson and other posted politicians say that their majority will be fully 20,000.

WE thank our Hustonville correspondent for some good words about our weekly.

WE go to press a delightful, soaking rain is falling. Praise the Lord!

NOTES OF CURRENT EVENTS.

—Hon. Ed Crossland, of Graves county, is dead.

—Mr. W. W. Bruce has purchased the Lexington Opera House at \$20,000.

—The small pox is raging at Covington, and many people have died with it.

—Mr. A. R. Dyer, of the Mountain Echo, mourns the death of a bright little son.

—The stockholders of the Louisville & Nashville Railroad will hold their annual meeting in Louisville on October 5 next.

—Mark Alexander, of Virginia, now 90 years of age, claims to be the oldest living Congressman. He served in Congress from 1819 to 1834.

—Ex-Gov. Dingley, Republican, was elected to Congress in Maine to fill the vacancy caused by the resignation of Senator Frye, by a majority of 4,541.

—Samuel Bagdad shot John Smith to death with a rifle in Bath county. The killing was entirely unprovoked.

—The Indians are an expensive evil to the Government. Since the treaty of 1868, in the shape of direct appropriations alone, the Sioux have cost the country \$19,000,000.

—H. H. Logan, who shot John Lynch in Shelby county on the 5th, has been held in \$500 for shooting in sudden heat and passion. Lynch was able to appear in Court.

—Three white men and two Indians were hung at Fort Smith, Ark., last Friday, on the same gallows and at the same time. There was some lively kicking for a few minutes.

—Like Arnold, the would-be murderer of Commonwealth's Attorney Bronson, has paid his fine of \$1,000, and is now at his home in Springfield. He says he was subjected to the most inhuman treatment while in prison.
